A Higher Education Collaborative Experience

Audit Interactive

Mark Maraccini is a lead partner at Crowe for providing risk and audit management services to public sector entities. Mark has over 24 years' experience working with public sector clients (not for profits) on internal and external audits, federal and state compliance services, risk management services and accounting assistance projects.

Over the past 24 years, Mark has worked a plethora of local governmental entities assisting either performing an audit or assisting them with contract compliance, regulatory compliance, accounting advisor services, risk and control assessments and other advisory type services.

Bill Dykstra is a Senior Manager in Crowe's Public Sector Consulting practices. Mr. Dykstra has a Bachelor of Science degree in Accounting and a Master of Arts degree in Nonprofit Management. He is also a Certified Internal Auditor (CIA) and has a Certification in Risk Management Assurance (CRMA).

Mr. Dykstra is an experienced auditor with over 24 years of serving higher education, government, and not-for-profit organizations. During his career, Mr. Dykstra has provided internal audit and risk consulting services to public and private educational institutions, state and local government agencies, public utilities, public transit authorities, and various not-for-profit service organizations and membership associations.

Session Objectives:

1. Understand the Critical Role of Internal Audit Before, During, and After ERP Implementations
2. Learn About Key Risks, Challenges, and Controls across ERP Implementation Phases
3. Gain Access to Practical Tools and Templates for Internal Audit Involvement

A Higher Education Collaborative Experience

Why Internal Audit Matters in ERP Implementations

WHAT ARE COMMON ROLES & RESPONSIBILITIES FOR INTERNAL AUDIT?

Prior to Implementation

Assessing governance, risk, and compliance needs

During Implementation

Reviewing system security and controls

After Implementation

Evaluating goal achievement and user adoption

A Higher Education Collaborative Experience

What is an ERP System?

A Higher Education Collaborative Experience

Audit Interactive

What is an ERP System?

Simply Defined: ERP systems are software that consist of multiple modules or applications which are designed to help organizations perform business processes.

COMMON ERP SYSTEMS USED IN HIGHER EDUCATION

ERP Benefits in Higher Education

A Higher Education Collaborative Experience

Audit Interactive

Why ERP Implementations Fail

Common Causes for ERP System Implementation Failure

Data Issues

Problems with data accuracy and migration

Poor Planning

Inadequate foresight and organization

Lack of Support

Absence of leadership and guidance

Customization Overload

Excessive tailoring of the system

Wrong ERP Choice

Selecting an unsuitable system

Change Management

Difficulty in adapting to new processes

Several studies suggest that Higher Education institutions experience more failures than other sectors with

Failure Rates Ranging from 60% - 90%

Internal Audit's Role in ERP Implementations

A Higher Education Collaborative Experience

Audit Interactive

Prime Opportunities for Internal Audit Contributions

-  Conduct Pre-Implementation Risk Assessment
-  Evaluate Governance and Project Oversight
-  Review Business Process Mapping & Change Management Plans
-  Evaluate Cybersecurity & Data Governance Risks
-  Monitor Project Milestones and Deliverables
-  Assess Training and User Readiness
-  Validate Testing and Quality Assurance Controls
-  Prepare for Post-Implementation Monitoring

How exactly is this done?

ERP Planning & Pre-Work Case Study of GPU

Group Exercise: Adding Value as Internal Auditors

Instructions for Small Groups:

1. Review the case study.
2. Focusing on each bullet under Planning & Pre-Work, identify opportunities where internal auditors could add value by providing assurance, advisory, or risk mitigation support.
3. Prepare a list of recommendations that internal audit should present to the ERP project team and senior leadership.

In Closing

Planning/Pre-Work Phase – IA enhances governance and risk management through risk assessments, vendor selection oversight, and control gap identification
IA Role in ERP.

Design Phase – IA assesses regulatory compliance and effective change controls before ERP development begins.

Development & Testing Phase – IA reviews system security mechanisms, validates data integrity, and assesses disaster recovery plans.

Training Phase – IA evaluates training effectiveness, user adoption risks, and compliance-focused user education.

Deployment & Stabilization Phase – IA supports a smooth go-live, validates post-implementation support, and helps document lessons learned.

A Higher Education Collaborative Experience

Audit Interactive

KEY TAKEAWAY

IA is essential throughout ERP implementation, providing risk management, compliance oversight, and continuous improvement.
